-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The drawings are objected to because Figure 5 does not use the proper cross hatching. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3742

Claims 1-3, 7-12, 15-16, 20-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Reddy et al. (US 6455816).

Reddy discloses a merchandiser for displaying and warming previously baked dough products under controlled drying conditions, comprising: an enclosure having one or more wall members that define an interior space, with at least a portion of one of the wall members being transparent; at least one opening for access into the interior space, a removable support member within the enclosure that includes at least one support surface for previously baked dough products and a spacing arrangement configured and adapted to reproducibly position the support member within the interior space of the enclosure member to facilitate substantially uniform airflow around each support surface and throughout the enclosure; and a heating system for providing heated air in the enclosure, wherein the substantially uniform airflow provides controlled drying of the previously baked dough products in the enclosure, wherein the enclosure has four wall members arranged in a generally rectangular configuration, the support member includes a frame, and the spacing arrangement is operatively associated with the frame and wall members to provide sufficient spacing between the frame and wall members to facilitate the substantially uniform airflow around the products, wherein the frame has a generally rectangular configuration with sides that correlate to the wall members, and the spacing arrangement includes spacing members that are present on each side of the frame.

Allowable Subject Matter

Claims 4-6, 13-14, 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
